

# Roll-On Cement Pool Plaster – Quick Guide

[Please refer to the full instructions for complete installation & start-up procedures available on our website.](#)

**Sider-Proof FF-PR – Roll-On Pool Plaster!** -A cement-based, swimming pool plaster and resurfacing coating for gunite & shotcrete pools, existing plaster & marcite, concrete and ICF swimming pools. It is packaged as a kit and easy-to-apply with a standard paint roller and smoothed with a MagicTrowel. It is suitable for residential, commercial, hot-tubs, chlorine and salt water system application. This coating is also designed to coat and waterproof water-falls, fountains & concrete ponds. This product is NOT a pool paint but a true cement-based swimming pool plaster and resurfacing coating.

## **+ Step 1. Surface Preparation - Clean the existing plaster/surface and tape the tiles, jets and fixtures**

## **+ Step 2. Repair existing damages (if present)**

## **+ Step 3. Mix the Sider-Proof FF-PR – Roll-On Pool Plaster**

**+ Step 4. Apply the first coat of the Roll-On Pool Plaster – Roll-it on with a paint roller and smooth it with the MagicTrowel**

**+ Step 5. Allow the first coat to dry then apply the second coat of the Roll-On Pool Plaster – Roll-it on with a paint roller and smooth it with the MagicTrowel**

**+ Step 6. Allow the second coat to dry, fill pool and follow the start-up instructions**
